

Process to “RedTag” an Asset (Screen shots from an Iphone)

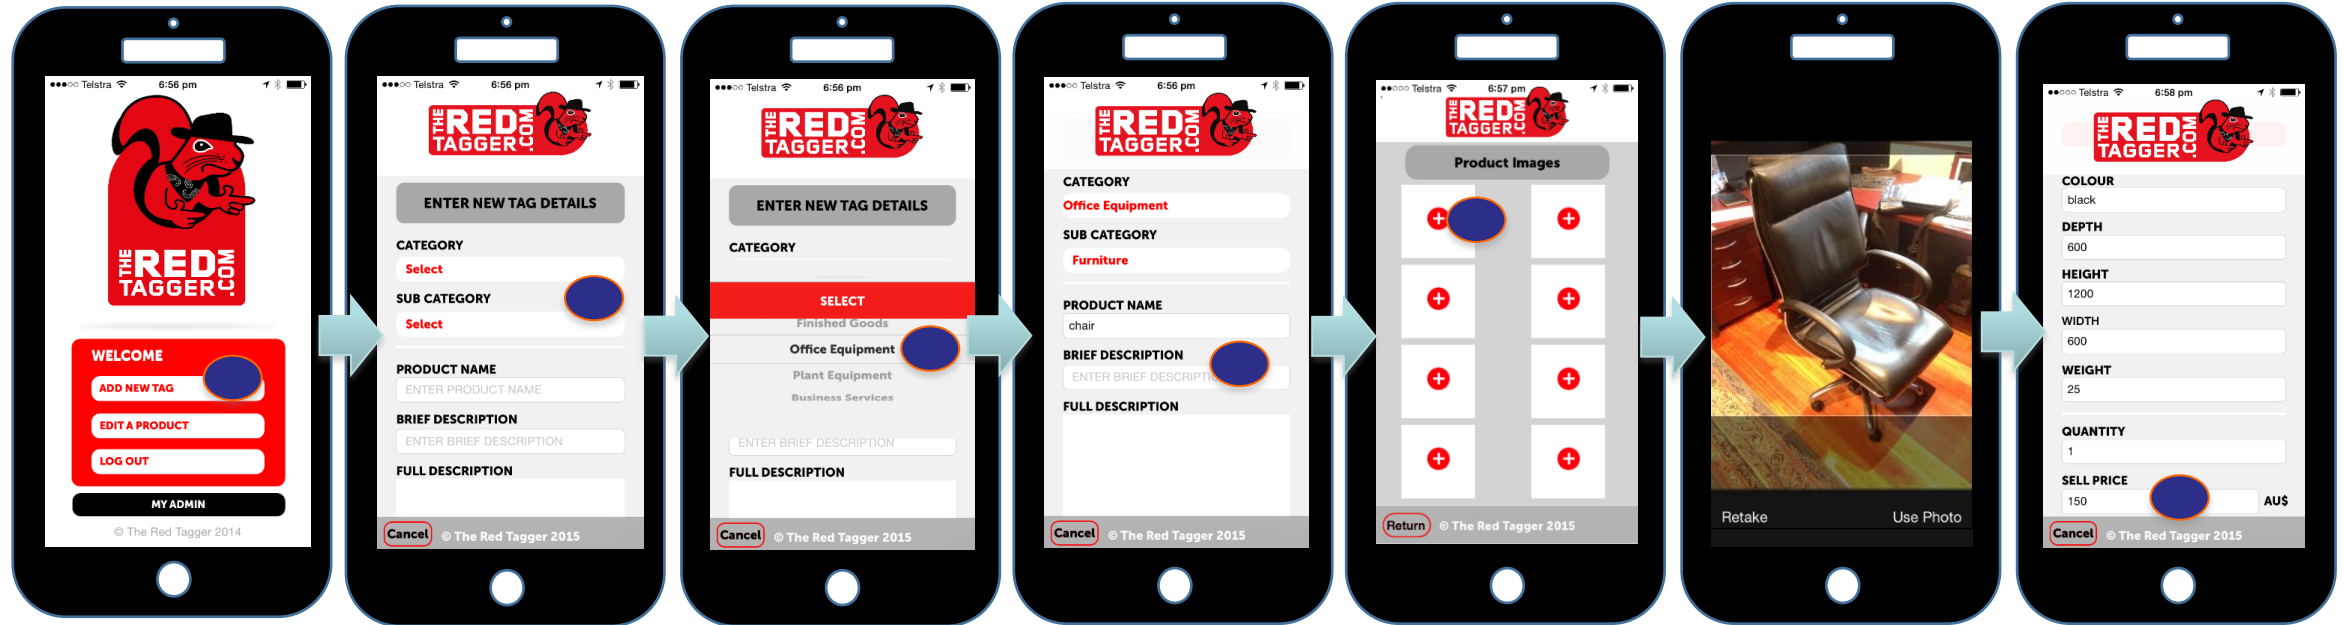

TheRedTagger App is designed to allow you to move from “Decision to sell” to “Available on Web for Sale” within 2 minutes

Open app and Select
“Add new tag”

Select the category & sub-category for your asset
from the options – then add a brief description

Take some photos using the app
on the phone

Add price /quantity

TheRedTagger app is available in the Apple App Store for Free. (Search on “theredtagger” and Download)

There is no charge to use the service – the price you sell at is the price you get – just create a free account on the Website – WWW.TheRedTagger.com

TheRedTagger.com can be used to RedTag Equipment, Material, Production Capacity, warehouse space, tooling etc – anything you no longer require that has intrinsic value can be RedTagged and offered for sale (and advertised) on the web for free using our TheRedTagger App and website.

WWW.THEREDTAGGER.COM

Hit Upload and your asset is now on the web – available for sale on WWW.THEREDTAGGER.COM

(Or kept in the database until further info is added later at the sellers discretion.) The item only goes live when the seller decide to make it so – can be done via the app or via the web page later)
